

IN THE CLAIMS

Please amend the following of the claims which are pending in the present application:

1. (Currently amended) An air circulation and ventilation unit ~~including~~ comprising:

a housing configured to fit at least partially over the ceiling of an equipment cabinet including fitting over at least one vent in the ceiling of the cabinet, so that the interior of the housing is in communication with the interior of the cabinet,

the housing having a housing vent ~~including~~ comprising a closure moveable between an open position in which air is permitted to flow through the housing vent between the outside of the housing and the inside of the housing and a closed position in which little or no air is permitted to flow through the housing vent between the outside of the housing and the inside of the housing, and

a controller to control the position of the housing vent closure.

2. (Currently amended) An air circulation and ventilation unit as claimed in claim 1 further ~~including~~ comprising a temperature sensor attached to the controller that provides an indication of the temperature inside the cabinet.

3. (Currently amended) An air circulation and ventilation unit as claimed in claim 1 further ~~including~~ comprising a fan inside the housing to circulate air.

4. (Original) An air circulation and ventilation unit as claimed in claim 3 wherein the fan is controlled by the controller.
5. (Currently amended) An air circulation and ventilation unit as claimed in ~~any one of claims 1 to 4~~ claim 1 further ~~including~~ comprising a heater inside the housing that is controlled by the controller.
6. (Currently amended) An air circulation and ventilation unit as claimed in ~~any one of claims 1 to 5~~ claim 1 wherein the controller ~~includes~~ comprises a solenoid that controls the position of the housing vent closure.
7. (Currently amended) An air circulation and ventilation unit as claimed in ~~any one of claims 1 to 6~~ claim 1 wherein the housing vent closure rotates between the open and closed positions.
8. (Currently amended) An air circulation and ventilation unit as claimed in ~~any one of claims 1 to 7~~ claim 1 wherein the housing vent and closure are provided in an external wall of the housing.
9. (Currently amended) The combination of an air circulation and ventilation unit as claimed in ~~any one of claims 1 to 8~~ claim 1, and an equipment cabinet

having a ceiling, with the housing fitting over at least one vent in the ceiling of the cabinet, so that the interior of the housing is in communication with the interior of the cabinet.

10. (Currently amended) A combination as claimed in claim 9 further ~~including~~ comprising a roof over the circulation and ventilation unit.

11. (Currently amended) A combination as claimed in claim 9 ~~or 10~~ further ~~including~~ comprising a fan inside the cabinet to circulate air.

12. (Currently amended) A combination as claimed in ~~any one of claims 9 to 11~~ claim 9 wherein the housing vent is offset from the cabinet vent(s).
